**INFORMATION DISCLOSURE STATEMENT**

Mail Stop Issue Fee  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Applicants are filing the English language translation of the Office Action mailed by the Japanese Patent Office on April 26, 2005 in the corresponding Japanese application. The documents referred to in the Japanese Patent Office Action were cited in the IDS filed in the

instant application on April 5, 2004. A check in the amount of \$180.00 is enclosed as set forth in 37 C.F.R. 1.17(p), the requisite fee associated with filing this Information Disclosure Statement.

Applicants respectfully request the Examiner to consider and make of record the documents cited herewith and that a copy of Form PTO-1449 be initialed by the Examiner and returned to the undersigned to acknowledge the Examiner's consideration.

As is apparent from said Office Action, applicant's undersigned attorney hereby certifies pursuant to 37 C.F.R. 1.97 (e) that the information contained in this Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this statement.

The filing of this Information Disclosure Statement is not an admission that the documents identified herein constitute prior art to the present application.

If any additional fees are incurred by the filing of this document the Office is authorized to credit to Deposit Account No. 50-0320.

Respectfully submitted,

FROMMER LAWRENCE & HAUG LLP  
Attorneys for Applicants

Examiner's Statement

Claims 1 to 6 are rejected in view of references D1 and D2 for lack of inventive step.

Reference D1 discloses a portable life game device, which is detachably connected to a TV game device. The portable life game device is capable of displaying expressions of, for example, electronic pets.

Meanwhile, in reference D2, facial expressions based on received message information are displayed, and the message information is converted into character strings or sound for the user. Therefore it would have been obvious to one skilled in the art to use the displaying means disclosed in reference D2 to display the expressions of reference D1.

Further, it is well-known art to incorporate a speaker into portable units in order to output sound. Furthermore, one skilled in the art would have appropriately chosen whether to incorporate the speaker inside of the unit, or to attach the speaker outside of the unit.

Meanwhile, many kinds of ways to output message information are known, such as outputting sound in association with displaying images, or displaying character strings, and therefore one skilled in the art would have chosen how to output message information, accordingly.

Moreover, switching an image to another image as a moving image, and random processing are commonly used in order to improve entertainment devices. Accordingly, these features do not have any technical significance.
